Exercise 2
Aggregate Functions & Grouping

Name: ~~Meg~~ Mengezi Khuzwayo
School: Bright-Learn.

Question 01
SQL Syntax

```
Select  COUNT(id) AS Total_Number_of_Employees
FROM    employees;
```

Table OUTPUT table

Total_Number_of_Employees
10

Question 02

```
Select  department,
        SUM(Salary) AS Total_Salary
FROM    employees
WHERE   Department = 'IT';
```

OUTPUT Table

Department	Total Salary
IT	220 000

Question 3
SQL Syntax

```
Select  Department,
        AVG(Salary) AS Average_Salary
FROM employees
WHERE Department = 'HR'
```

Today's mood:
- Craving coffee
- 11/10
- Logging off
- Main character energy
- BRB overthinking
- _____

To unpack tomorrow:

TYPO

Date: / /

Output Table

Average_Salary	Department
49500	HR

Question 04

SQL Syntax

```
Select  Max(Salary) As Highest_Salary
        Min(Salary) As Lowest_Salary
FROM    employees;
```

Output Table

Highest_Salary	Lowest_salary
62000	48000

Question 05

SQL syntax

```
Select department,
       SUM(Salary) Total_Salary
FROM employees
GROUP BY Departments;
```

Output Table

Department	Total_Salary
IT	220000
HR	90000
Marketing	105000
Finance	119000

Today's mood:

- Craving coffee
- 11/10
- Logging off
- Main character energy
- BRB overthinking
- _____

To unpack tomorrow:

TYPO

Date: / /

Question 06
SQL syntax

```
Select   count(id) AS Total_Employees,
         City
FROM     employees
Group By city
```

output Table

Total_Employees	city
2	New York
3	Chicago
2	Los Angeles
1	San Francisco
1	Houston

Question 07
SQL syntax

```
Select   department,
         AVG(Salary) AS Average_Salary
FROM     employees
Group By department
ORDER BY Average_Salary DESC
```

Department	Average_Salary
IT	73333,33
HR	45000
Finance	59500
Marketing	52500

output Table

Today's mood:
- Craving coffee
- 11/10
- Logging off
- Main character energy
- BRB overthinking

To unpack tomorrow:

TYPO

Date: / /

Question 08

```
Select department,
       sum(salary) As Total_Salary
FROM employees
Group By department
HAVING sum(salary) > 100 000
```

Output Table.

Department	Total Salary
IT	220 000
Marketing	105 000
Finance	119 000

Question 09

SQL Syntax

```
Select city,
       count(id) As Number_of_Employee
FROM employees
Group By city
ORDER BY ~~employee~~ Number_of_Employees DESC
Having count(id) > 1
```

Output Table

Number_of_Employees	city
2	New York
3	Chicago
2	Los Angeles
2	San Franscico

Today's mood:

- Craving coffee
- 11/10
- Logging off
- Main character energy
- BRB overthinking
- _____

To unpack tomorrow:

TYPO

Date: / /

Question 10
SQL Syntax

```
Select department,
       AVG(Salary) AS Average_Salary
FROM employees
Group By Department
Order By Average_Salary DESC
~~Order By~~
Limit 1;
```

OUTPUT Table

Department	Average_Salary
IT	13 333,33

Today's mood:

- Craving coffee
- 11/10
- Logging off
- Main character energy
- BRB overthinking
- _____

To unpack tomorrow:

TYPO

Date: / /

Today's mood:

- [ ] Craving coffee
- [ ] 11/10
- [ ] Logging off
- [ ] Main character energy
- [ ] BRB overthinking
- [ ] _____

To unpack tomorrow:
